R32	1	46			Senate Only	[325G.60] Termination election required. A website must include a termination election on the website.
R33	1	47			Senate Only	[325G.61] Unconditional gifts. If the seller sends a good to a consumer under an indefinite subscription agreement without first obtaining the consumer’s consent to the agreement and to receive the good, the good is an unconditional gift.
R33	1	48			Senate Only	[325G.62] Exemption. Provides several exemptions to sections 325G56 to 325G.61.
R33			1	22	House Only	Citation. Provides a short title for the act, which is codified in its own new chapter of Minnesota Statutes.
R34			1	23	House Only	Definitions. Defines key terms for this chapter. Importantly, “account holder” is any social media account holder, while “user” just refers to an account holder in Minnesota. The scope of “social media platform” is set largely within the definition in this section.
R36			1	24	House Only	Scope; exclusions. Subjects a social media platform to this chapter if it is active in Minnesota and meets the threshold in paragraph (a). Paragraph (b) specifies how a social media platform may determine whether an account holder is a Minnesota-based user.
R37			1	25	House Only	Requirements for social media platforms. Imposes new prohibitions and requirements on social media platforms. Subd. 1. Content optimization. Requires a platform to provide a user interface that allows users to indicate what content they do or do not want, and the algorithm must respect those preferences.

						<p>A platform is specifically prohibited from pushing content to users that does not align with users' preferences simply to maximize users' time and engagement on the platform.</p> <p>Subd. 2. Account interaction limits. Requires platforms to set limits for “new account holders” or highly active account holders to limit their impact on Minnesota-based users. Discourse on platforms can be distorted or dominated by a small minority of account holders. Frequently, these account holders may have recently created “burner” accounts, and they are often some of the most active account holders on a platform.</p> <p>Subd. 3. Default privacy settings. Requires specific default privacy settings for users. Generally, these default settings focus on keeping user-generated content within a user’s chosen social network. Also prohibits the platform from allowing user-generated content to be scraped and utilized by generative artificial intelligence, without a user’s consent. Specifies that a user may opt to change these default settings.</p> <p>Subd. 4. Option for heightened protection. Requires platforms to allow users to easily opt into a set of specified heightened protections. These heightened protections include prohibiting platforms from using features (e.g., infinite content feeds, auto-play of next videos, etc.) that encourage increased use, and prohibiting visual counts of “likes,” etc., on user-generated content.</p> <p>Provides that users can opt-in to these on a specific platform or change a setting on a device (i.e., their phone or tablet) so that they will automatically be opted-in to these heightened protections across all platforms on the device. Also provides that any device with parental controls enabled will automatically be opted-into heightened protections.</p> <p>Subd. 5. Transparency requirements. In paragraph (a), requires platforms to post certain information about how their algorithms operate, how they enact the requirements in this bill, information about product experiments on users, and other relevant data on platform use. Also, in paragraph (b), requires platforms to provide users an explanation for each piece of recommended content for why the algorithm is promoting it to them.</p>
