Hennepin County

Hennepin County **Medical Center**

Hennepin
Health

- Defined provider network with shared electronic health record
- Risk-sharing funding model
- Integration of medical and social services
- Consensus governance model

Human Services

Public Health

Prospective enrollment in health plan

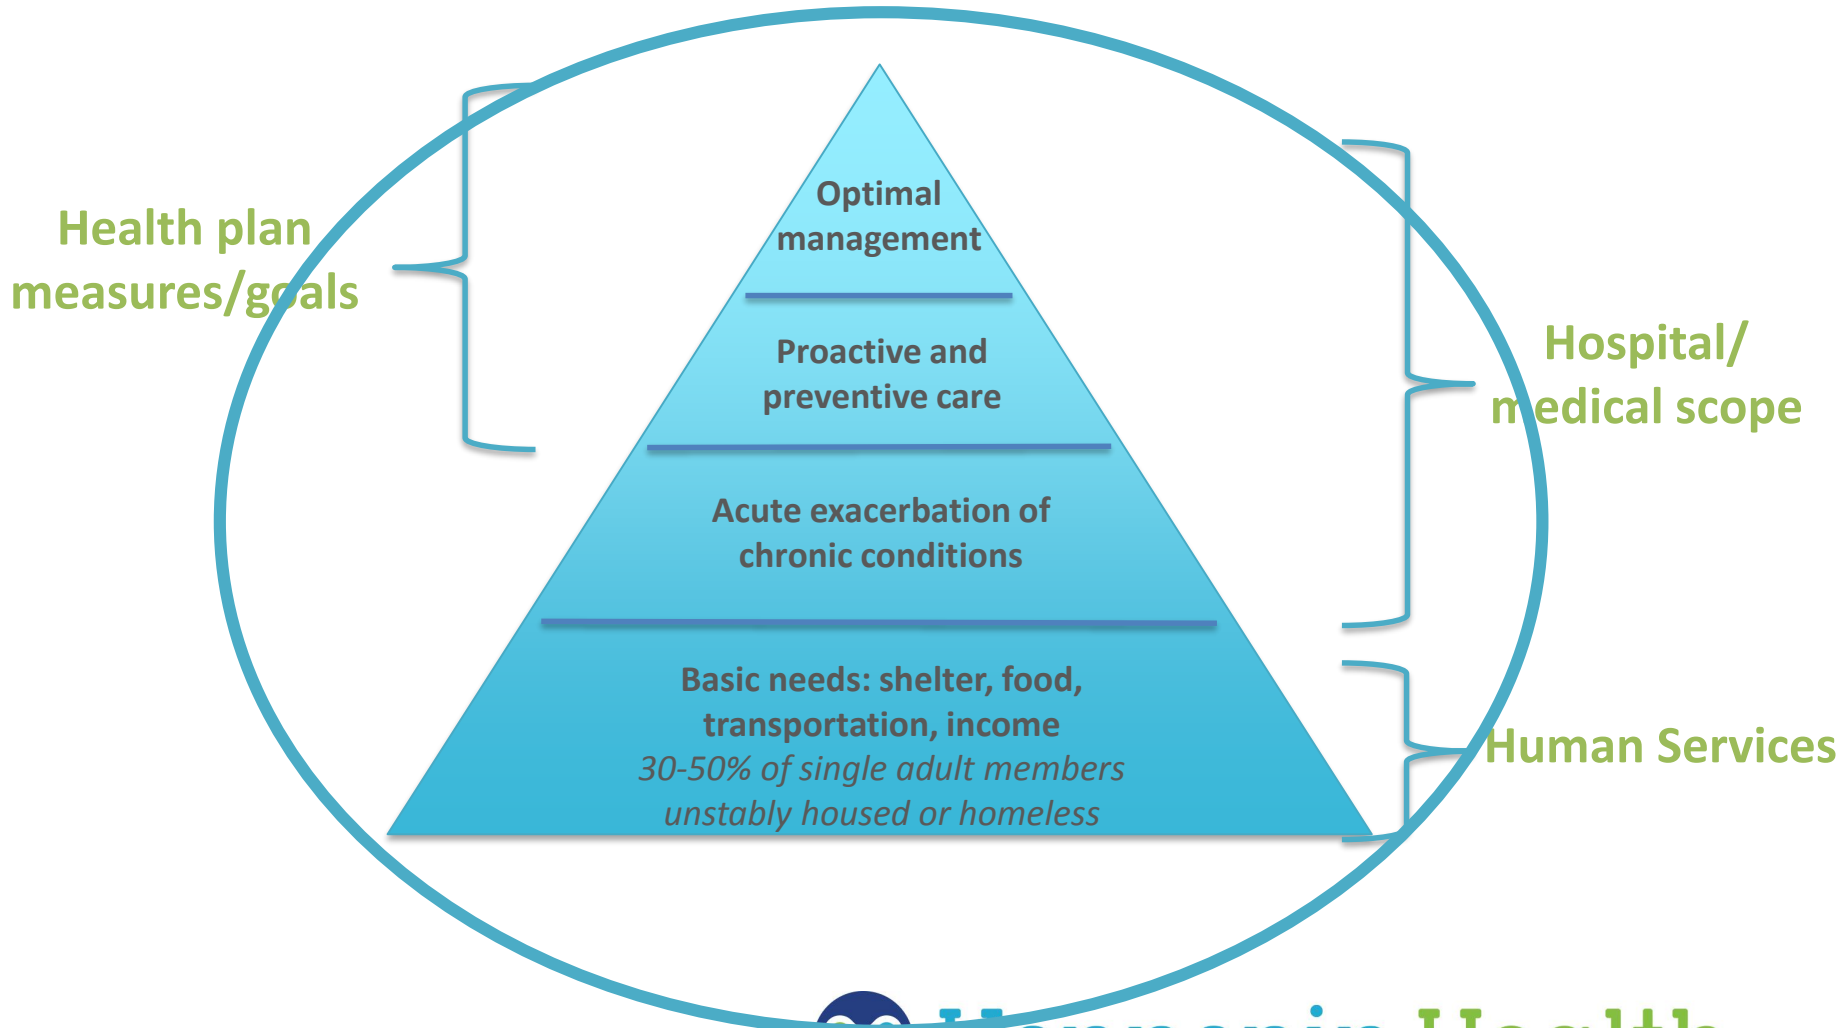

Capitated Reimbursement from State Medicaid Agency

Medicaid Expansion Population Profile

- Average Age = 39; No Dependents
- 70% Male
- 65% People of Color
- Common Overlapping Issues:
 - Diagnosed Mental Health Conditions (40%)
 - Diagnosed Substance Use Disorder (36%)
 - Homelessness/Unstable Housing (49%)
- Significant “Cross System” Utilization
 - >50% of County Jail Stays
 - 46% of Felony Criminal Cases
 - >50% of Emergency Shelter Stays

Opportunities to Improve Outcomes

Evolution of the Model

- Then (2012 – 2015)
 - Health reform demonstration model
 - Average of ~10,000 members
 - Serving exclusively Medicaid expansion (adults without children) members
- Now (2016 – present)
 - “Mainstream” Medicaid insurance offering in Hennepin County through competitive procurement
 - Over 30,000 members
 - Increasing proportion of Medicaid families and children

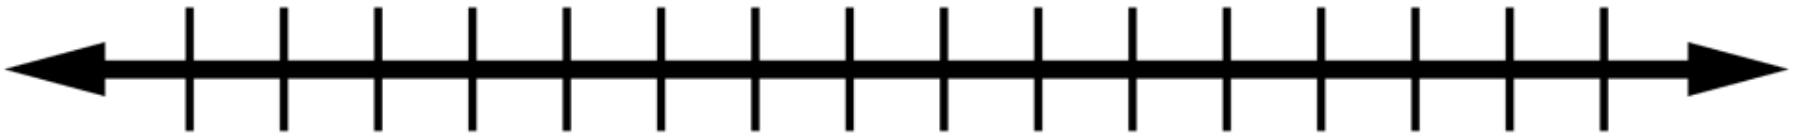

Facilitators of Success

- Prospective enrollment of members/patients
- Flexibility in spending Medicaid dollars
- Defined clinic network
- Direct hyper-local reinvestment of savings
- Care model interventions aimed directly at social needs
- Collaborative governance

Broadening Conception of Accountability

Thank You!
