

Minnesota's Behavioral Health System: An Overview

Paul Fleissner | Behavioral Health Division Director Neerja Singh | Behavioral Health Clinical Director

Human Services Reform Committee Meeting

January 21, 2021

Presentation overview

- Children's mental health services
- Adult mental health services
- Substance use disorder treatment services
- Gaps
- System transformation

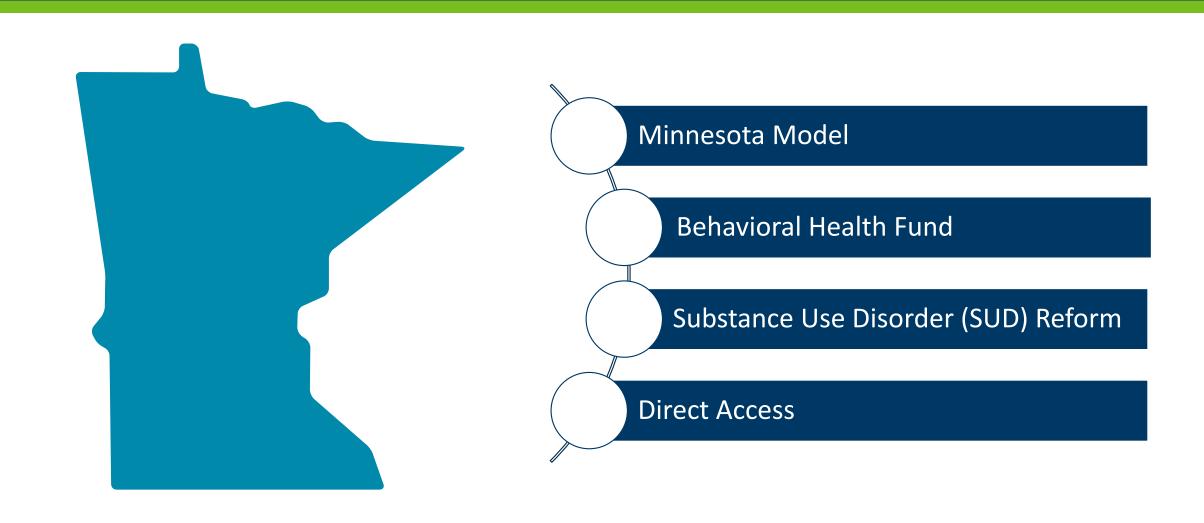

What is Behavioral Health?

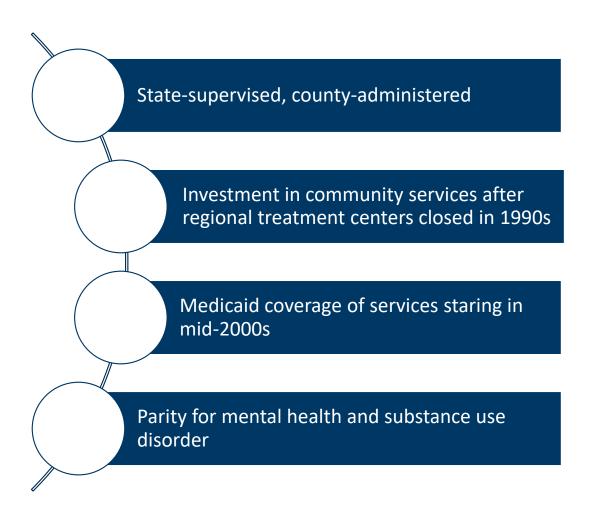

The federal Substance Abuse and Mental Health Services Administration (SAMHSA) defines "behavioral health", in the context of behavioral health integration, as:

 "the promotion of mental health, resilience and wellbeing; the treatment of mental and substance use disorders; and the support of those who experience and/or are in recovery from these conditions, along with their families and communities."

Historical context- Substance use disorder system

Historical context- Mental health system

Prevalence in 2019

- 182,781 adults with serious mental illness and children with serious emotional disturbance
- Estimated 5.2% of all U.S. adults with serious mental illness
 - 65.5% received mental health treatment during the year
 - Nearly \$1.2 billion state expenditure

- 64,166 drug and alcohol admissions
 - 68.13% White / 31.87% BIPOC or Other

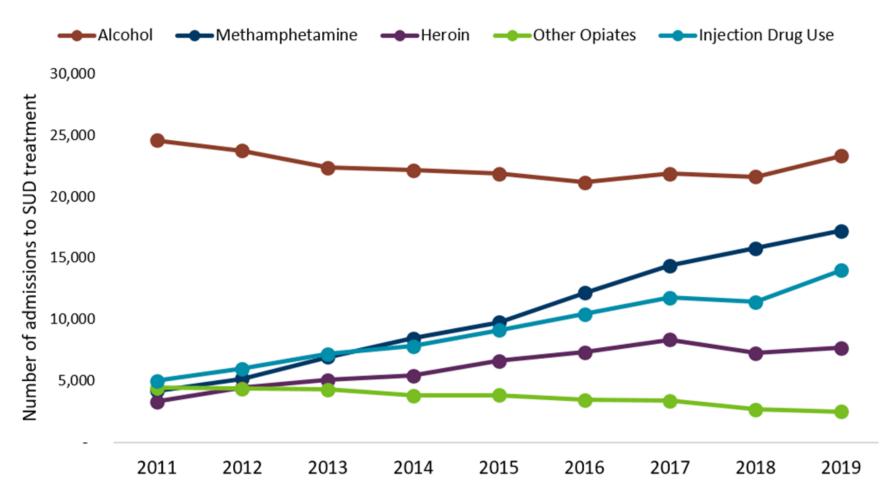

- Primary substance used at admission:
 - 38.11% alcohol
 - 27.33% methamphetamine
 - 34.56% injectable drugs, heroin, and other opiates

Sources:

- Substance Abuse and Mental Health Services Administration (SAMHSA);
- Drug and Alcohol Abuse Normative Evaluation System (DAANES)

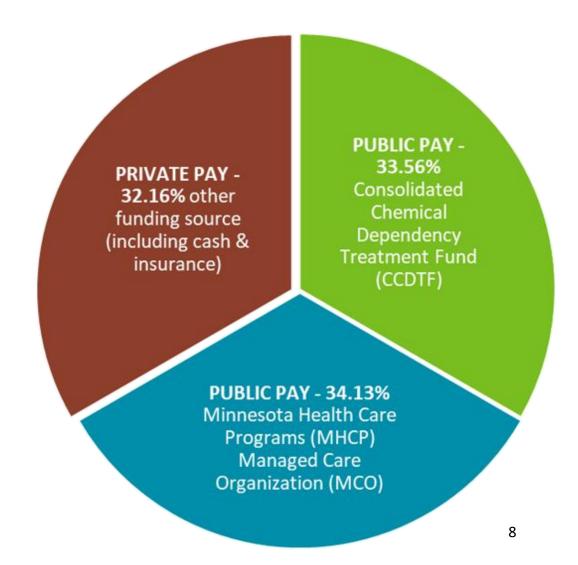

Alcohol remains the primary substance used at admission to substance use disorder treatment for adults in Minnesota. In 2019, methamphetamine was the second leading substance used at admission to treatment.
