Re: Language Essentials for Teachers of Reading and Spelling Grants

Dear Chair Chamberlain and members of the committee,

Reading proficiency is critical for success in college, career, and life. Research has found that students who were not proficient in reading by the end of third grade were four times more likely to drop out of high school than proficient readers.¹ Despite this, being able to teach reading was one of the most common things over 50 educators told us that they didn't learn, but wished that they had, in teacher preparation.² This need is not unique to Minnesota. Despite a large body of research supporting scientifically-based methods of early reading instruction,³ the vast majority of teacher education programs do not teach it.⁴ Only 22% of teacher education professors say they center their philosophy around explicit, systematic phonics,⁵ the method which most effectively supports early readers.

This is why we support SF 244, which would allocate \$1 million to provide Language Essentials for Teachers of Reading and Spelling Grants training for more than 2,800 teachers. Our youngest Minnesotans—particularly those who have traditionally underserved—do not have time to wait and deserve educators with expertise in literacy instruction.

Reading Proficiency, MCA 2019
