Bill Description

Section 1 of the bill limits the teacher shortage definition to positions filled with very specific licensure types. Section 2 of the bill expands reporting requirements for districts to PELSB. Section 3 of the bill outlines requirements for the Teacher Supply and Demand Report.

Assumptions

It is assumed that Section 1 of the bill is an increase in data collection and analyst work. Some of the data is currently collected by the STAR report, but not disaggregated in the ways proposed in this bill. Additionally, there is a new category not yet collected through STAR “unfilled positions”. This would require either an additional staff to work with districts to collect, aggregate, and report on this new data. PELSB calculates a teacher shortage annually, so this section would be required each year.

Sections 2 and 3 would occur on a biennial basis and would not need additional work other than what is addressed in Section 1.

Expenditure and/or Revenue Formula

1.0 FTE Data Management Specialist = \$135,000

Long-Term Fiscal Considerations

Local Fiscal Impact

Districts do not currently have a standardized system for collecting data on “unfilled” positions. This would be an added cost to districts who do not have this information readily available.

Additionally, Section 1 will remove nearly all licensure areas for the list of shortage areas in Minnesota, which would prevent Minnesota teacher preparation candidates from accessing the federal TEACH grants.
