Re: Clean Water Council, Environmental Group Position

Dear Governor Walz,

I would like to continue serving on the Clean Water Council representing environmental organizations. I currently serve as vice-chair of the Council and chair of the Council's Policy Committee. It's been an honor to serve in this capacity and I'm proud of what the Council has accomplished.

I have spent over 20 years of my professional career protecting and restoring the lands and waters of Minnesota. Much of this work has been working with private landowners and building the capacity of partners in greater Minnesota. As The Nature Conservancy's Water and Land Protection Director, I work with Minnesota's private and public-sector leaders to find pragmatic solutions to today's most pressing conservation issues. I have partnered with academic institutions, agencies and the Conservancy's own scientists to apply scientific rigor to conservation practices and evaluation. I have and will continue to place an emphasis on outcome-based planning and program delivery informed by monitoring and evaluation.

Minnesota is fortunate in many ways. We are indeed a water rich state. Unfortunately, many of our waters are impaired. Many are at risk and climate change creates even more uncertainty for the health of our waters. Minnesotans place a high value on our state's water resources and overwhelmingly voted to invest in clean water via the Clean Water Land and Legacy Amendment. The Clean Water Fund is a great opportunity to ensure clean water is an enduring legacy of Minnesota. This legacy can only be achieved with sound leadership and direction. As a member of the Clean Water Council I will continue to advocate for the Clean Water Fund to be used to its fullest potential and secure Minnesota's waters for generations to come.

Sincerely,

Richard L. Biske
Water and Land Protection Director
The Nature Conservancy MN-ND-SD
