12/1/21

Dear Governor Walz,

It is with great gratitude that I submit my application for the Board of Animal Health Livestock Producer position. I have been greatly humbled to serve one term on the board and believe my experience and background as a farmer provides the board with valuable production animal industry knowledge.

After receiving a degree in Animal Science from North Dakota State University, I served the turkey industry as Ag Program Specialist and Membership Coordinator for the Minnesota Turkey Growers Association. In that role, I strived to not only promote the industry, but to specifically support our farmers as they worked to provide the healthiest and safest supply of turkey products in the world. My job included working with farmers, educating the public in such realms as community events and the State Fair, and reaching out to youth through school visits.

During the outbreak of Highly Pathogenic Avian Influenza (HPAI) in 2015, I was embedded in the tireless efforts of informing poultry producers as the outbreak spread, informing the public of the impacts of the outbreak, and providing a producer's viewpoint of the hardships that farmers are going through as the outbreak spread. Being a current member of the board, I am an Emergency Disease Management Committee member and participate in routine industry discussion to ensure preparedness in the event our industry would be affected again by HPAI. So many of my decisions today about how our family operates our farm are impacted by what transpired during that outbreak.

My family has operated Oakdale Farm since 1866 and has been raising turkeys since the early 1900's. With a rich history as a turkey breeder farm, we transitioned to raising market turkeys in January 2020. As the sixth generation on our farm, I'm truly very lucky to experience and understand both sides of the turkey industry. My husband and I look forward to continuing to improve our operation and hope to pass on the farm to the seventh generation.

Livestock production is in my blood. As a member of the Board of Animal Health, I will continue to work to ensure that farmers have the support needed to provide the best living environment for their animals as possible. As our industry changes, so do our practices that ensure animal health. I believe that it is crucial for the Board of Animal Health to have members that are currently producing livestock and have a vision for the future of livestock production.

It is for all the aforementioned reasons that I submit my application to serve as a livestock producer on the Board of Animal Health. Please see my attached resume and application for further information and I would be happy to answer any questions you may have.

Respectfully submitted,

Erica Sawatzke
